Welcome to the 360°Insight™ online demonstration site

360°Insight™ can create a driver for real change, kick starting vigorous debate around leadership, values and behaviours. Tailoring the design specifically to the competencies, values and language of your business, 360°Insight™ can help uncover the (un)reality of performance and the way it is perceived. Predaptive's 360°Insight™ is built around the principles of transparency, development and alignment.

Our 360° Degree Feedback system, 360°Insight™ Online, is a browser based system that captures feedback around individual behaviours from key stakeholders. This generates constructive, informed and sometimes provocative feedback on an individual, team and organisational level, thereby creating a very powerful catalyst for organisational change.

Here you have the opportunity to take a look around and learn more about the potential of 360°Insight™.
